SASAI HIROAKI

(54) HANDY TERMINAL FOR AUCTION SYSTEM

(57)Abstract:

PURPOSE: To provide a handy terminal for an auction system which is able to introduce even to a small-scale auction market where an auction place is small without the need of a wide place.

CONSTITUTION: This terminal is provided with an ID storage part 11 for storing the ID number of a purchaser, an operation part 12 provided with a data button 12a for inputting purchase data such as a lane number and a lot number, etc., and a transmission button 12b for performing proposal, a data storage part 13 for storing the purchase data, a display part 14 for displaying auction information such as an auction value or the like, an I/F part 15 for outputting the purchase data or the like to a communication channel and inputting the auction information or the like from the communication channel, a control part 16 for controlling the respective parts, a cable 17 for connecting the communication channel and a power source part 18. Then, it is inserted to a plug socket 3 for an auction to be connected to the digital exchange 24 of an automatic auction system 2 provided in the auction place.

LEGAL STATUS

[Date of request for examination]

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number]

[Date of registration]

[Number of appeal against examiner's decision of rejection]

[Date of requesting appeal against examiner's decision of rejection]

[Date of extinction of right]
